-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).°

Art Unit: 3744

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kobayashi et al. Kobayashi et al discloses the claimed invention except for the flange portion 111 and the tube member 110 being separately formed and fixed together. The recitation of the flange portion and tube member being formed separately is considered to be a matter of obvious choice to one of ordinary skill in the art, as to whether the items are integrally formed or formed separately and the joined together. Furthermore, the recitation of the flange portion and tube member being formed separately is considered to be a method of assembly which does not have patentable weight in an apparatus claim. The manner of fixing the tube member and flange portion is considered to be a matter of obvious choice, as the recited methods of fixing such as welding and caulking are considered to be well known methods of joining items together.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
